Mahashivaratri
Mahashivaratri is significant because of the immense spiritual benefits it offers due to natural planetary positions. On this night, the northern hemisphere of the planet is
positioned such that there is a natural upsurge of energy in the human system, pushing one towards their spiritual peak. It is therefore considered important to stay awake with the spine erect to benefit from this natural upsurge of energy. The forces of the night are agnostic to faith or religion making Mahashivaratri a universally significant night for all human beings, especially those on the spiritual path.
